

Flatbed Zonani Oyinga Togri Olib Kirish

Modul/Dars: 8-modul (beamng flatbed) | 1-dars (flatbed zonani oyinga togri olib kirish)

Mavzu

Ushbu darsda BeamNG.drive o'yiniga tayyor Flatbed zonani to'g'ri kiritish, mavjud zonalarini o'chirish va modifikatsiyalarni o'rnatish jarayoni o'rgatiladi. Maqsad – talabalarga berilgan zonani o'yin ichida muammosiz ishga tushirishni ko'rsatish.

Asosiy nuqtalar

- Berilgan Flatbed zonaning tuzilishi va tarkibi (mashinali va mashinasiz versiyalar) bilan tanishish.
- BeamNG.drive o'ynining `current`, `levels` va `mods` papkalarining ahamiyatini tushunish.
- Yangi zonani kiritishdan oldin mavjud `Estacosta` zonasi va `mods` papkasini to'g'ri o'chirish.
- `flatbed baza.zip` faylini yuklab olish va `WinRAR` yordamida ochish.
- `mods` papkasini `current` papkasiga, tanlangan `Estacosta` zonasini esa `current/levels` papkasiga ko'chirish.
- Mashinali zonaning ishlashi uchun `mods` papkasining to'g'ri o'rnatilishi shart.
- Kompyuter quvvatiga qarab, mashinasiz zonadan foydalanish va mashinalarni qo'lda joylashtirish zarurati.

Qadamma-qadam yo'riqnoma

1. O'yindan chiqish: BeamNG.drive o'yinidan to'liq chiqing.
2. `Current` papkasini topish:
 - O'yin ichidan: `Manager User Folder` -> `Open User Folder` orqali kirish.
 - Yoki avval pin qilingan bo'lsa, to'g'ridan-to'g'ri kirish.
3. Mavjud zonalarini o'chirish:
 - `Current` papkasi ichidagi `levels` papkasiga kiring va `Estacosta` zonasini o'chiring (`Delete`).
 - `Current` papkasi ichidagi `mods` papkasini o'chiring (`Delete`).
4. `Flatbed baza`ni yuklab olish va ochish:
 - Telegramdan berilgan `flatbed baza.zip` faylini yuklab oling.
 - Faylni `WinRAR` yordamida zipdan oching (`Извлечь файлы` yoki `Extract files`).
5. `Mods` papkasini ko'chirish:
 - Ochilgan `flatbed baza` papkasi ichidagi `Flatbed uchun mashinalar` -> `mods` papkasini `copy` qiling.
 - `Current` papkasiga o'ting va `mods` papkasini `paste` qiling.

6. `Estacosta` zonasini ko'chirish (mashinasiz):
 - `Flatbed baza` papkasi ichidagi `Pianina zonasi` -> `Mashinasiz zona` -> `Estacosta` papkasini `copy` qiling.
 - `Current` papkasi ichidagi `levels` papkasiga o'ting va `Estacosta` papkasini `paste` qiling.
7. O'yinni tekshirish: O'yinga kirib, zonaning to'g'ri yuklanganligini tekshiring (bu holatda mashinalar bo'lmaydi).
8. `Estacosta` zonasini ko'chirish (mashinali, ixtiyoriy):
 - Agar mashinasiz zona muvaffaqiyatli ishlasa va mashinali zonani sinab ko'rmoqchi bo'lsangiz:
 - `Current/levels` ichidagi mavjud `Estacosta` zonasini o'chiring.
 - `Flatbed baza` papkasi ichidagi `Pianina zonasi` -> `Mashinali
